

# Labonte Concrete Ltd.

Mathieu and Gaetan started Labonte Concrete Ltd. in 2010 after many years working for other businesses in the construction industry. The family-owned business, located at 632 Hwy 94 in Corbeil, has grown substantially to include 15 full-time staff.

Labonte Concrete provides a range of concrete services including foundations, poured footings, walls, slabs, insulated concrete forms and more to residential, commercial and industrial customers. Last year, the company expanded to include concrete cutting, coring, drilling and injection services. This has allowed the company to increase its customer base and extend its geographical service area. In fact, at the time of this interview Mat had just returned from a day trip to Timmins to complete some work.

“One of the most memorable moments of the business was purchasing our own boom truck and concrete pump truck. This has allowed us to be a one-stop-shop for all concrete services, eliminating the need for us to rent equipment to complete certain jobs,” said Mat. Purchasing this equipment allows Labonte Concrete to continue to provide high-quality craftsmanship and also offer an additional service through renting out equipment and hiring out operators to other companies in the area.

When asked what advice he would give to others exploring the opportunity of becoming an entrepreneur, Mat mentioned that the key to success is having a strong team of reliable and dedicated employees, and that also means treating them well. Additionally, ensuring that clients are always happy with the end product is vital to building a satisfied customer base. “Never bite off more than you can chew, always over exceed expectations than underdeliver,” advised Mat. “Just remember, being an entrepreneur isn’t a 9-5 job, but the rewards, pride of work and passion for the industry outweigh the late nights and risks involved.”

Congratulations on 11 years of business, and we look forward to seeing what new exciting projects are on the horizon!
